

## Global Impact Investing Network Principles

At Tower Peak Partners (“TPP”), we are dedicated to redefining private equity investment by aligning financial performance with meaningful, measurable social and environmental impact. As a leader in the private equity sector, our mission is to deploy capital in a way that not only delivers attractive returns for our investors but also drives positive change across industries and communities worldwide.

### A Purpose-Driven Investment Philosophy

In an ever-evolving global landscape, we recognize the essential role that private equity plays in tackling the world’s most pressing challenges. Our investment philosophy is firmly grounded in the belief that sustainable and impact-driven investments can generate superior long-term value. At Tower Peak Partners, we prioritize investments that foster progress in key areas aligned with the United Nations Sustainable Development Goals (SDGs). These areas include:

- **Climate Action & Clean Energy:** Supporting companies advancing renewable energy, energy efficiency, and climate resilience.
- **Healthcare & Wellbeing:** Backing innovative solutions that enhance healthcare access, improve outcomes, and promote wellbeing across populations.
- **Inclusive Economic Growth:** Focusing on businesses that promote economic inclusion, job creation, and equitable development in underserved communities.
- **Sustainable Resource Use:** Investing in companies that advance sustainable agriculture, water conservation, and responsible consumption practices.

By integrating these thematic areas into our investment decisions, we strive to build a portfolio of businesses that not only perform well financially but also deliver measurable impact aligned with global sustainability goals.

### Commitment to ESG and Impact Integration

Our approach to investment is holistic and rigorous. At TPP, we have adopted a comprehensive Environmental, Social, Sustainable and Governance (“ESG”) framework, embedding ESG principles into every stage of the investment process. From due diligence to post-investment monitoring, we work to ensure that each of our portfolio companies upholds high standards of environmental sustainability, social responsibility, and ethical governance.

We also work closely with our portfolio companies to develop impact strategies that align with their growth objectives while enhancing their capacity to create positive change. These efforts are not only integral to driving better financial outcomes but also to positioning our businesses for long-term success in an increasingly impact-focused global market.

### Measuring and Reporting Impact

As a proud member of the Global Impact Investing Network (GIIN), TPP is committed to upholding transparency and accountability in our impact journey. We rigorously measure and report on the social and environmental

performance of our portfolio companies using internationally recognized impact measurement frameworks, such as IRIS+. This ensures that our investors and stakeholders have clear, comparable data on how their investments are contributing to a more sustainable and inclusive future.

We provide detailed, periodic reports on the impact and ESG performance of our portfolio, highlighting both the positive outcomes and areas for continuous improvement. This transparency allows us to build strong relationships with our investors and ensure that they can see the tangible impact of their capital in action.

### **Building a Global Network for Impact**

TPP is proud to collaborate with the GIIN and like-minded investors, entrepreneurs, and thought leaders who share our vision of leveraging private capital for the greater good. We believe that true progress is made through partnership, and by joining forces with the GIIN and its network, we aim to contribute to the growth and evolution of the impact investing ecosystem.

As we look to the future, our goal remains clear: to be at the forefront of the impact revolution within private equity, delivering both robust financial returns and lasting positive change. By continuously refining our strategies, deepening our impact measurement capabilities, and expanding our investment portfolio, Tower Peak Partners is committed to shaping a more equitable, sustainable, and resilient global economy.

Together with the GIIN and our investors, we are paving the way for a new generation of responsible, purpose-driven investment.
